New FAA STC Received for 350/130 Aux Tank

**Attachments:** 

SR02794NY.pdf; SH05-4Issue3.pdf

All,

Some good news for a change ... we have received New FAA STC SR02794NY for the 350/130 Aux Tank Installation ... Just in time for Heli Expo!!! As you know, we took over this product from JCA about 2.5 years ago because they were unable to obtain FAA/EASA certification of this product. A complete re-design of the bottom of the tank was required prior to FAA acceptance of the design. Thanks to everyone for their efforts to make this happen. It has been painful to say the least.

You will note that the FAA approval is restricted to the newer version of the tank (P/N D350-794-111 and D130-794-121). The emphasis has been on obtaining the FAA approval so there will still be some delay on having the new p/n tanks in stock. We are also looking to make additional changes to improve manucturability, inspectability, and maintainability of the tanks. Therefore, I suspect the lead time on the new tank design is still about 2 months, but I will leave this to Bill & Linda to confirm.

I will send a separate email to John and Russell at JCA to let them know that we have finally achieved FAA certification of this product. The Canadian STC had to be revised prior to FAA certification, so both the TCCA and FAA STC's are attached to this email.

Regards, David
